

Child Wellbeing qualitative interviews

Children consent script and interview guide. Version 2 08.06.2020

Introduction: Thank you for taking the time to speak to me today. Before we start I am going to ask you a few questions to make sure that you are happy to take part in this study.

- I am going to ask you a few questions about what you have been up to and how you have been feeling during lockdown and not attending school.
- I am going to record this interview and afterwards we will write it out so that we can use it in our study. Is this ok?
- We can stop the interview at any time for any reason you just need to tell me to stop.
- Everything you say in the interview will be kept private, unless we have concerns about your safety and health. If we do have concerns, we may tell someone who can help you, like your parents (only if you agree) or a doctor or a school nurse.
- Are you happy to speak to me today?
- I also just wanted to add that there are no wrong answers to my questions and I am not concerned about any rule-breaking anyone has done during lockdown, I am just trying to find out a bit more about how young people have been doing during this time.
